

Sections are located in the book Titled (Pierce Functional Screening) with more details and interventions

Section 3 GRADING SCALE (CHRONIC NEUROLOGICAL CONDITIONS)

6 ~ Good+ ~ client is able to target item independently (may require set-up)

5 ~ Good ~ lack visual focus and attention skills, awkward motor movement, requiring physical modeling support from the examiner.

4 (Fair +) ~ Fine motor skills impaired, requires minimum physical support

3 ~ (Fair) ~ Movement is intentional reflexes/hypertonic making it difficult to manipulate large tools/devices minimum physical guidance/support and verbal cues.

2 ~ (Poor +) ~ Client requires moderate physical guidance/support and verbal cues and intermittently lack visual focus to demonstrate functional visual motor movement to complete an activity. ©©

1 ~ (Poor) ~ Client is unaware that his/her body VM movement can control tools/devices, does not focus, and requires consistent maximum physical guidance/support and verbal support.

Section 9 Communication through eyes

5/5 ~Intentional eye movement

4/5 ~ Negative Intentional movement

3/5 ~ Intentional movement lacking focus on target

2/5 ~ on verbal command movement occurs

1/5 ~ Unintentional movement
