4

Components of a Comprehensive Language Assessment

- Referral
- Questionnaire and Interview
- Case History
- Observation
- Standardized Testing
- Dynamic Assessment
- Language Sample Analysis (LSA)
- Recommendations

SUGAR Language LLC 2021 ©

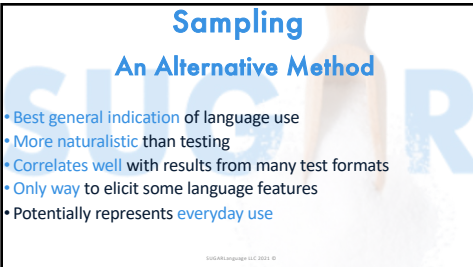

5

Sampling
An Alternative Method

- Best general indication of language use
- More naturalistic than testing
- Correlates well with results from many test formats
- Only way to elicit some language features
- Potentially represents everyday use

SUGAR Language LLC 2021 ©

6

Where did LSA come from?

SUGAR Language LLC 2023 ©

7

Roger Brown

- Seminal study of early language development, entitled *A First Language* (1973) *
- Revolutionized the study of child language development studies
- Changed the assessment of communication abilities of children with language impairment (LI).
- SLP's have changed the basic methodology very little in the intervening four decades.

*Taken from: Brown, R. (1973). *A First Language for the early stages*. Cambridge, MA: Harvard University Press.

SUGAR Language LLC 2023 ©

8

Brown's Work

- Collected extensive language samples
- Each sample consisted of at least **700** utterances per month
- Sample size only included 3 children
- Documented information on early language form between ages 2 - 4
- Different grammatical stages described by mean length of utterance (MLU)

SUGAR Language LLC 2023 ©

9

Brown's Participants

- Three typically developing (TD) children
 - Adam: 27 months old; parent's education level- *college*
 - Eve: 18 months old; father's education- *college*; mother's education- *high school*
 - Sarah: 27 months old; parent's education level- *high school*
- Children were typically developing (TD)
- All from Cambridge, Massachusetts
- Parent occupations: Minister, Harvard graduate student, and clerk

SUGAR Language LLC 2021 ©

10

Brown's Methods

- Transcriptions of the mother and child were collected
- Samples were collected in the home
- A minimum of **two hours** of transcription per month
- **Two examiners** per language sample
- Examiners used a video recorder to collect the samples

SUGAR Language LLC 2021 ©

11

How do SLPs conduct LSA?

SUGAR Language LLC 2021 ©

12

Research Questions

- Do school-based SLPs use LSA in their clinical practice
- What are the characteristics of the language samples SLPs collect?
- What are the methods of analysis?
- What are the barriers that school-based SLPs identify in using LSA?

SUGAR
Sampling Utterances and Grammatical
Analysis Revised

13

Pavelko, Owens, Ireland, & Hahs Vaughn (2016)

1,399 school-based SLPs

- 88% were ASHA certified
- 95% held a master's degree in CSD
- Over 75% had caseloads of 21 or larger
 - 21-40 students 29%
 - 41-60 students 44%
 - 61-80 students 16%

SUGAR
Sampling Utterances and Grammatical
Analysis Revised

14

Do SLPs use LSA?

- Not so much...
 - 33% did not use LSA AT ALL in the previous school year...

SUGAR
Sampling Utterances and Grammatical
Analysis Revised

15

Frequency of Sampling	
10 or fewer Samples	55%
11-20 Samples	23%
21-30 Samples	9%
> 30 Samples	11%

* Of the 67% who reported using LSA during the previous school year

SUGAR
Sampling Utterances and Grammatical
Analysis Revised

16

Sample Length	
1-5 Minutes	27%
6-10 Minutes	46%
11 minutes or longer	27%

SUGAR
Sampling Utterances and Grammatical
Analysis Revised

17

Number of Utterances	
Less than 25 utterances	11%
26-50 utterances	42%
51-100 utterances	35%
More than 100 utterances	12%

SUGAR
Sampling Utterances and Grammatical
Analysis Revised

18

Elicitation Task

	Birth to 3	Preschool (ages 3-5)	Elementary School	Middle School	High School
Conversation	96%	96%	96%	93%	94%
Narrative (e.g., "tell me a story")	63%	69%	74%	75%	75%
Expository (e.g., "Explain how you...")	40%	39%	41%	42%	42%
Picture description	73%	74%	76%	71%	74%
Observation of child communication in school setting	76%	77%	70%	72%	73%
Other	14%	8%	7%	6%	5%

19

Recording the Sample

Audio	43%
Video	17%
Neither*	52%

Transcribe what the child is saying while the child is talking*

SUGAR

25

Lessons Learned

How SLPs Sample	Barriers to Overcome
<ul style="list-style-type: none">• 50 Utterances• 10 minutes or less to collect sample• Conversation	<ul style="list-style-type: none">• Time Consuming• Limited Training/Expertise• Limited Recognition as a Valid Assessment Measure

SUGAR
Sampling Utterances and Grammatical
Analysis Revised

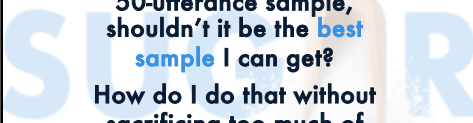

26

If I only have one 50-utterance sample, shouldn't it be the best sample I can get?

How do I do that without sacrificing too much of a sample's representative conversational nature?

28

What is a Robust Sample?

- THE MOST IMPORTANT PART!!
- Engages the child in a conversation that gives the child the opportunity to produce complex language
- Allows the child to control the interaction
 - Children are more communicative and use more complex language

SUGAR Language LLC 2011 ©
SUGAR, LSA, NARR & NARRATIVE

29

Collecting a Robust Sample

- Offer the child every opportunity to produce complex language
 - Turnabouts
 - Process Questions
 - Narrative Elicitations

SUGAR Language LLC 2011 ©

30

SUGAR Conversational Strategies

- Turnabouts = Comment + Cue for child to talk
- Process Questions
 - *How did...*
 - *I wonder what you...*
 - *Why did...*
 - More than one-word “why” questions
 - Not appropriate for kids below 4.5 yrs

SUGAR
Sampling Utterances and Grammatical
Analysis Revised

31

SUGAR Conversational Strategies

- Use narrative elicitations instead of yes/no questions
 - Build on what the child says or on what you know
 - Begin with...
 - *Your mom says you.... That sounds like fun. Tell me what happened.*
 - *I know that you.... Tell me what happened.*
 - *Did you ever.... Tell me what you did.*
 - *What happened...*
 - *Tell Me*

SUGAR
Sampling Utterances and Grammatical
Analysis Revised

32

Some Examples

- What does the EXAMINER do?
 - Verbal
 - Non Verbal
- Suggestions for improvement?

SUGAR
Sampling Utterances and Grammatical
Analysis Revised

33

Determining A Robust Sample

- In your sample...
 - Are there 10 child utterances that are one-word?
 - Were these utterances prompted by the examiner?
 - If yes... NOT a robust sample
- An Example.
- What did the examiner say?

SUGARlanguage LLC 2021 ©

34

If at first you don't succeed...

- Remember, you need a robust sample!

SUGARlanguage LLC 2021 ©

35

Recording Samples

- Most children, even those with language disorders, will produce 50 utterances in about 7 minutes
- Record on a SECURE device
 - Remember HIPAA

SUGARlanguage LLC 2021 ©

SUGAR
Sampling Utterances and Grammatical
Analysis Revised

37

Deciding Utterance Boundaries
SUGAR Method Handout

- An utterance is a sentence or less
- Utterances are separated by a pause (2 seconds), drop in voice, inhalation or combination of these
 - Even if the pause occurs in the middle
"I want a [2 second pause] cookie" = 2 utterances
- Even if the pause is filled:
"I want a uh-h-h [2 second filled pause] cookie" = 2

SUGAR
Sampling Utterances and Grammatical
Analysis Revised

38

Deciding Utterance Boundaries

- If an utterance contains more than two clauses joined with *and*, consider it a run-on sentence and divide as follows:
We went to the circus and I saw clowns and there were elephants and I got this sweet sticky stuff.
Becomes...
We went to the circus and I saw clowns.
There were elephants and I got this sweet sticky stuff.
- Do **NOT** do this with other conjunctions.

SUGAR
Sampling Utterances and Grammatical
Analysis Revised

39

Unintelligible Words & Utterances

- If the entire utterance is unintelligible, omit it.
- If a word is unintelligible, type nonsense, such as "XXX" in place of the word.
- You can have two unintelligible words in an utterance. If an utterance has 3 or more unintelligible words, omit the utterance.

SUGAR
Sampling Utterances and Grammatical
Analysis Revised

40

SUGAR Transcription

- Transcribe the sample directly into your computer.
- Only type the student's utterances, NOT yours.
- Turn the "Numbering" function on to ensure you only type 50 utterances.
- Type in plain English as spoken.
- Omit punctuation to save time.

SUGAR
Sampling Utterances and Grammatical
Analysis Revised

41

SUGAR Transcription

- Do NOT embellish the student's utterance. In other words, don't add morphemes that are missing.
- Type words in full even when pronunciation omits portions as follows:
 - *Talkin'* should be transcribed as "Talking"
 - *Gonna, wanna, gatta, hafta* should be transcribed as "going to, want to, got to, have to".
- Type contractions as is. In other words, *don't* should be typed as "don't" and *I'm* as "I'm"

SUGAR
Sampling Utterances and Grammatical
Analysis Revised

42

SUGAR Transcription

- Do NOT include fillers (uhhhh, ummm, like, you know).
- Do NOT include disfluencies. **Only include the fullest form of what the student actually said.** Example: "He said...he says...he tell me secrets" becomes "He tell me secrets."
- Do NOT include repeated words unless it is for emphasis, as in "He went down down down in the cave."
- Highlight elliptical and imperative utterances

44

SUGAR Metrics

- Total Number of Words (TNW)
- Mean length of Utterance – SUGAR (MLU_{SUGAR} or MLUs)
- Words per Sentence (WPS)
- Clauses per Sentence (CPS)

SUGAR
Sampling Utterances and Grammatical
Analysis Revised

45

46

47

SUGAR Considerations

- We hoped to develop a tool that could be used from preschool through early elementary school
 - Rice et al (2010) had reported little change in MLU through age 10
- We had data on additional morpheme use from the pilot study
 - We decided to include the most frequently used bound morphemes from the pilot study
 - Reviewers told us we couldn't still call it MLU, so we modified it to

MLUSUGAR

SUGAR
Sampling Utterances and Grammatical
Analysis Revised

©2014 Language LLC 2014 ©

48

Morpheme	Example
-ing adjective gerund progressive verb	Smiling girl I love hiking He is jumping
-s plural possessive third person singular	Cats Mommy's shirt He walks
-ed adjective regular past tense	I am married He scared me
dis-	Dislike

49

Morpheme	Example
-er comparative	Bigger
-est superlative	Biggest
-ful	Thoughtful
-ish	Foolish
-ly	Really
-ment	Entertainment
re-	Reteach
-sion	Discussion
-tion	Education
un-	Unhappy
-y adjective	Bumpy

50

MLUSUGAR

- 2 Morphemes
 - Wanna, gotta, hafta
- 3 Morphemes
 - gonna

SUGAR
Sampling Utterances and Grammatical
Analysis Revised

51

52

Words per Sentence (WPS)

Both a sentence and a clause contain a subject and the accompanying verb, as in *Mommy walked*

Sentence = Noun/pronoun subject + Accompanying verb

A sentence can have more than one clause, as in "*Mommy walked but I ran*"

The critical element in determining a sentence is the presence of a **VERB**

SUGAR
Sampling Utterances and Grammatical Analysis Revised
© 2014 University of Utah. All rights reserved.

53

When is a Sentence a Sentence?

• **Common questions**

- What about *wh-* words that in writing we set off as sentences? *Why? When? How?* **NOT sentences**
- What if the subject and verb are there but the thought is incomplete? *We went to...* **YES, a sentence because of a subject and a verb**
These are children, not adults and thoughts are often incomplete.

SUGAR
Sampling Utterances and Grammatical Analysis Revised
© 2014 University of Utah. All rights reserved.

54

When is a Sentence a Sentence?

- **Common questions**
 - So imperatives would count as a sentence?
YES, because the verb is present. The verb is key
 - Is it a sentence if the child omits the subject and verb but they're understood, as in "Me."
Nope. No subject, no verb

SUGAR
Sampling Utterances and Grammatical
Analysis Revised 11.0

55

CPS

SUGARlanguage LLC 2021 ©

56

Clauses per Sentence (CPS)

A clause contains a subject and the accompanying verb

The critical element in determining a clause is the presence of a **VERB** and a unique subject

Two clauses:
I walked to the store while my mom cleaned the house

One Clause
I walked to the store and cleaned the house
