

**Lively Letters-samples for hands-on practice sessions during trainings.**

In advance, please download and cut out to prepare these mini Lively Letters pieces for use during the hands-on sections of the training. The instructors will tell you how to use the materials during these portions of the training. Of course the actual Lively Letters cards are larger and sturdier than this set that we are offering you to use in the training! We just wanted you to get the feel of how you and your students will be using the Lively Letters cards in tracking activities to improve phonemic awareness and phonics skills.
